## VEHICLE CONDITION

**Exterior Condition:** Upon examination, the vehicle exhibits mainly cosmetic damage, most notably to the right-hand side. Scratches and dents are present on the front bumper, hood, and roof, suggesting exposure to external forces. The damage to the passenger side rear quarter panel is extensive and requires panel replacement rather than repair. Additionally, the passenger side mirror and rear quarter glass are compromised and need replacement. The damages are confined to the vehicle's exterior and are rectifiable with professional bodywork and component replacement.

**Interior Condition:** The vehicle's interior presents in good condition, reflecting responsible use and maintenance. The upholstery, including seats and carpeting, maintains a clean appearance with no significant wear or damage. Interior surfaces such as the dashboard, console, and door panels exhibit no major marks or blemishes. There are no pervasive odors or signs of harsh usage. All manual controls and fittings are intact and functional. The condition of the interior aligns with the expected standards for a vehicle of its age, mileage, and class, demonstrating a satisfactory level.

**Electrical Components:** A comprehensive testing of all electrical components has been conducted with positive results. The list of components verified includes, but is not limited to, the following:

- Headlights, Taillights, and Indicator Lights
- Instrument Cluster and Dashboard Illumination
- Power Windows and Central Locking System
- Multimedia System, Navigation, and Vehicle Information Interface
- Climate Control System
- Adjustable Seating and Mirrors
- All components are confirmed to be in full working order, functioning as intended by the manufacturer.

**Test Drive – Mechanical Assessment:** Due to the vehicle's salvage title status, conducting a full test drive to assess its mechanical operation under road conditions was not feasible. However, upon starting the vehicle, it was observed to run well and show no signs of damage to the engine. It was also confirmed that the vehicle is capable of moving under its own power within the confines of the current environment. These observations suggest that the primary mechanical components, including the engine, are functioning effectively.

In summary, the vehicle exhibits exterior cosmetic damage, notably on the right-hand side, with repairable scratches and dents, and a need for replacement parts on the passenger side. The interior is in good condition. All electrical components are functioning properly. Mechanically, the vehicle starts and runs well. Overall, the vehicle is well-maintained with manageable exterior repairs and a solid operational foundation.
